

Introducing the **NEW** TM8235 *dual mode* mobile radio

We are delighted to announce the release of the TM8235 MPT 1327 trunked mobile, giving you a choice of trunked mobile radio products in the Tait TM8000 range

The TM8235 features an LCD display and enables 3-digit dialling with large fleet access (0-999). 100 conventional channels and built-in CTCSS and DCS allow users to access a conventional radio network when needed, or when out of range of the trunked network.

The TM8235 also offers MAP27 data capability and Direct Connect GPS as standard.
